**International conference**

# **PLANT TISSUE CULTURE AND GENOME ENGINEERING**

**Santa Susanna, Barcelona**

**10-13 May 2026**

- Advanced gene-editing technologies
- Agricultural biotechnology and crop improvement
- Molecular regulation of organogenesis in vitro
- Epigenetic regulation during in vitro regeneration
- From protoplasts to plant
- From explant to *de novo* organ formation
- Molecular mechanisms of somatic embryogenesis and organogenesis
- Double haploid formation using genome elimination or gamete culture
- and more...

Organizers (contact us for details)

Prof. Bastiaan Bargmann, Virginia Tech

Dr. Luca Nerva, CREA, Conegliano

Dr. Tomas Matus, I2SysBio

Prof. Leor Williams, HUJI Univ

Dr. Samuel Bocobza, ARO-Volcani

**Registration is open to all, and  
abstract submission for oral  
presentation is highly encouraged.**
